

purposes to be present at the ceremony attending the erection of a monument to Commodore Perry at Kuribara, Japan, July 14. The ceremony has something of an international aspect, as it is indicative of the kindly sentiments existing between Japan and the United States.

As to his plan for the trip, Admiral Ramsey writes: "Believing it to be of great interest to the United States to be well represented on that occasion, it is my intention to attend the ceremony with the Brooklyn, and such other vessels as conditions at that time may enable me to take in company, starting from Chefoo and making this fit in as part of the squadron drill and cruising which I have planned for this summer."

NEW LIEUTENANTS NAMED. CALIFORNIA ALLOWED FOURTEEN. (BY THE NEW ASSOCIATED PRESS-P.M.) WASHINGTON, April 24.—The Secretary of War today made public the names of the men selected for first and second lieutenants in the regular army under the Army Reorganization Bill. Many of these men have had service in the regular army before being selected as candidates for examination, and should they pass will be appointed. The allotment for California is four: as follows: George E. L. Smith, H. P. Ford, Rowland B. Ellis, Frank T. Thornton.

SIX MILLIONS SUNK IN MINING OPERATIONS.

IMMENSE SWINDLE ALLEGED IN LOWER CALIFORNIA.

Isaac Irwin of San Diego and Randolph Surbridge of Boston sued on charge of conspiracy—Twelve Thousand Stockholders Lose All.

(BY THE NEW ASSOCIATED PRESS-P.M.)

BOSTON, April 24.—The Post says that Neile McPeek, senior member of the firm of McPeek & Co., stock brokers, this afternoon commenced an action for conspiracy against Randolph Surbridge, a prominent Boston attorney, and Isaac Irwin, a mining operator of San Diego, Calif.

Behind this action is a story which, according to the complainants, means that about \$4,000,000 has been swallowed up in gold mining operations.

The Post further says that the mine in question is the Fortuna.

Twelve thousand stockholders are said to have lost all they put in. C. H. Boynton, who is president of the action, says New York is reported to have sunk \$50,000. The mining property of the company has been known by two separate and distinct names, the Fortuna-Republic and the Fortuna-Republic and the Consolidated Fortuna-Republic. The properties are located in Ensenada, Lower California.

SHIPPING MEN CREMATED.

SALT LAKE (Utah) April 24.—A speech to the Trinity Hotel Hotel, Mr. says, Emanuel Karsner and Alvin Miller, employee of John Frazer, a prominent Cassadocia county sheep man, were burned to death last night on Six Mile Mountain. The bodies were found under the dirt roof of their cabin. It is supposed the cabin caught fire while the men were asleep, and the roof in falling penned them inside the blazing building.

NO TROUBLE AT UNTAH.

SALT LAKE (Utah) April 24.—Reports that trouble was brewing among the Indians of the Uintah reservation were denied by Dr. H. G. Myron, of the White Rock, Utah, agent.

LINCOLN'S REMAINS IN THE NEW CRYPT.

(NEW ASSOCIATED PRESS-P.M.)

SPRINGFIELD (Ill.) April 24.—Unostentatiously, and without any ceremony, the remains of Abraham Lincoln and the other members of his family, which, since March 10, 1900, when the work of rebuilding the Lincoln monument commenced, have been reposing in a temporary stone vault near the monument, were this afternoon placed in the crypt in the monument which has been rebuilt by the State of Illinois at a cost of \$100,000.

The ceremony of returning the remains to the monument was witnessed by Gov. Yates and other State officials, the members of the Lincoln Monument Association, the surviving members of the Lincoln Guard of Honor, Judge Humphrey of the United States District Court and other Federal officials, Mayor Phillips and other city officials, and probably two hundred citizens who had been advised of the intended removal. No public announcement of the arrangements for the ceremony had been made.

The temporary vault was so thoroughly cemented that it was 5 o'clock, three hours after the work of removal commenced, when the remains of the President, which were the last to be removed, were finally placed in the marble sarcophagus in the crypt in the monument where they were sealed up, and where they will probably remain through all time.

The casket was not opened for the identification of the body of the martyr President, as had been expected, nor was even the leaden casket exposed to view, it being covered by a cedar casket. The remains which now rest in the tomb of the monument are those of President and Mrs. Lincoln, their sons Willie, Thomas (Tad), and Teddie, and Abraham, son of Robert T. Lincoln.

OHIO ABOVE DANGER LINE.

Much Inconvenience at Cincinnati.

Mills and Business Houses Closed.

Square Mile of Newport, Ky., Inundated—Rate of Rising Falling.

(BY THE NEW ASSOCIATED PRESS-P.M.) CINCINNATI (O.) April 24.—At 6 o'clock tonight the river's stage was 57.5 feet, but since 3 o'clock the rate of rising has been from one and a half to about one-half an inch per hour. The stage at 6 o'clock is 55 feet above the danger line, and the rate of rising indicated 56 feet after midnight.

Although the rate of rising is gradually decreasing, the flood will exceed the predicted limit of 58 feet. Estimates on the river's stage in sight are that the water will not become stationary until tomorrow afternoon, when it is not expected to exceed 58.5 feet. Since it became evident that the stage would exceed 58 feet, there has been much stir and inconvenience here tonight. The business men and manufacturers in the business section are particularly worried, and many more families than were anticipated will be driven out of their homes along the Little Miami and along the Little Miami on the east.

On the Kentucky side, the interruption to mills, factories and business is not as great, but the proportion of the population made more difficult driving from their homes than on the Ohio side. In the Taylor bottoms, between Newport and Louisville, Ky., the water has risen to the point where steamers are compelled to transfer passengers from Bellevue and Dayton, Ky. The latter place is largely inundated. It is estimated that about a square mile of Newport is inundated. The railroads are proceeding, and will continue under sloping conditions. Boats are used in reaching the track.

The Louisville side is a swamp swept away. The Little Miami is a sheet of water, the Kentucky side is under water. Coney Island, another summer resort on the Ohio side, east of Cincinnati, is also under water, as are Chester Park and the large beer gardens on the west side.

MAHONING DANGEROUSLY HIGH. (BY THE NEW ASSOCIATED PRESS-A.M.) YOUNGSTOWN, April 24.—The Mahoning River is at 58 feet, the highest ever reached in the Mahoning Valley, and is steadily rising. Steady rain is reported along the upper part of the valley. The suburb of Haslett is inundated, and several miles have been compelled to suspend operations.

The Post further says that the mine in question is the Fortuna.

Twelve thousand stockholders are said to have lost all they put in. C. H. Boynton, who is president of the action, says New York is reported to have sunk \$50,000. The mining property of the company has been known by two separate and distinct names, the Fortuna-Republic and the Consolidated Fortuna-Republic. The properties are located in Ensenada, Lower California.

SHIPPING MEN CREMATED.

SALT LAKE (Utah) April 24.—A speech to the Trinity Hotel Hotel, Mr. says, Emanuel Karsner and Alvin Miller, employee of John Frazer, a prominent Cassadocia county sheep man, were burned to death last night on Six Mile Mountain. The bodies were found under the dirt roof of their cabin. It is supposed the cabin caught fire while the men were asleep, and the roof in falling penned them inside the blazing building.

landing. A woman who jumped from the suspension bridge was evidently a suicide. None of the bodies have been recovered.

At New Richmond, O., a summer resort, many families were driven out of their homes today.

At Huntington, W. Va., the river registered 57.2 feet at 6 o'clock, and was still rising, and rain was falling in sheets. The small bridge was booming tonight, and it appears the crisis is yet to come at this point.

At Ironton, O., the stage was 55 feet, and it is expected to rise to 56 feet. Over one hundred families had to move from West Ironton today. All merchants in Center street, the business street in Ironton, have had to

At Portsmouth, O., a report was circulated today that the flood gates on the dykes would be opened as the water level would soon be 58 feet. Hundreds prepared to move. Mayor Miller distributed circulars everywhere, saying that whistles would be blown to indicate when the gates would be opened. Gangs of men in charge of officials patrolled the flood defenses, strengthening and building them higher. Engines are used at various places in pumping water out.

NOT SO ENCOURAGING. (BY THE NEW ASSOCIATED PRESS-P.M.) PEKING, April 24.—The flood outside the Middle Ohio Valley is 57.5 feet, but since 3 o'clock the rate of rising has been from one and a half to about one-half an inch per hour. The stage at 6 o'clock is 55 feet above the danger line, and the rate of rising indicated 56 feet after midnight.

Although the rate of rising is gradually decreasing, the flood will exceed the predicted limit of 58 feet. Estimates on the river's stage in sight are that the water will not become stationary until tomorrow afternoon, when it is not expected to exceed 58.5 feet. Since it became evident that the stage would exceed 58 feet, there has been much stir and inconvenience here tonight. The business men and manufacturers in the business section are particularly worried, and many more families than were anticipated will be driven out of their homes along the Little Miami and the east.

All sorts of reports come from Catterburg tonight about rains in the Cumberland Mountains of Northeastern Kentucky. One from Hinton says about heavy rains tonight in the southern and eastern parts of West Virginia. At both places, as well as Ashland, there is a great deal of mud and mud slides, and now and then a mudslide, and many more families than were anticipated will be driven out of their homes along the Little Miami on the east.

The Weather Bureau map, tonight shows rains prevailing in the east that may have moved into the Allegheny and start again in the Ohio, whose lower tributaries began rising tonight.

At the same time, the stage of the Ohio River at Cincinnati was 55.5 feet, or eight feet above the limit that had been predicted by the weather bureau for the American.

An employee of the British legation had a similar experience. Hillyer, manager of the bank, was stopped and made to pay a fine for crossing the Ohio.

The Chinese say there is intense feeling in the province against the foreigners, principally because of the harsh treatment they have received from the Germans. They also assert that the needless expeditions of Germans against perfectly quiet communities have caused many Chinese who have lost all, to join roving bands of robbers.

BRIGANDS KILLED OFF.

PAO TING FU IS CLEANED.

(BY THE NEW ASSOCIATED PRESS-P.M.) VANCOUVER (B. C.) April 24.—Major-General MacKenzie, doing his military expedition to put an end to the brigandage near Paotung Fu, has apparently been successful.

The robbers, who were entrenched in caves near the great wall, were attacked simultaneously by three columns. They offered strong resistance, when the brigands were killed.

Twenty-five houses on Rad street are surrounded by from two to six feet of the great flood of 1900.

LOUISVILLE'S SOAK.

BUSINESS MEN MOVED GOOD.

(BY THE NEW ASSOCIATED PRESS-A.M.) LOUISVILLE (Ky.) April 24.—The river here at 10 o'clock today was rising at a fraction over two inches an hour. The danger line is 35 feet at the water gauge, which shows 36.5 feet, and the Ohio River Bureau forecaster believes that will be passed about noon tomorrow. The water has reached the business houses at the foot of Fourth, Fifth, Sixth and Seventh streets, and is several feet deep in many cellars. With the first warning of the Weather Bureau, owners of property likely to be flooded moved their goods, and those houses which will be only from the buildings being water-logged.

PASSING DANGER LINE.

(BY THE NEW ASSOCIATED PRESS-P.M.) LOUISVILLE, April 24.—The Ohio reached the danger line, twenty-eight feet here tonight, and at 6 o'clock was rising an inch an hour. The danger line is 35 feet at the water gauge, which shows 36.5 feet, and the Ohio River Bureau forecaster believes that will be passed about noon tomorrow. The water has reached the business houses at the foot of Fourth, Fifth, Sixth and Seventh streets.

OBITUARY.

Dr. Henry Bryon McElroy.

CHICAGO, April 24.—McElroy, a specialist to the Tribune from St. Louis, Mo., says Dr. Henry Bryon McElroy of that city is dead here, from "neuritis of the brain." He was a prominent dental and medical surgeon. Dr. McElroy was born in Salina, near Syracuse, N. Y., and received the degree of doctor of dental surgery in 1884. He organized the Missouri Dental Association, and in 1877 was elected president of the American Dental Association. In 1882, he was chosen president of the American Dental Association, and of the Southern Dental Association, and the Mississippi Valley Southern Dental Society. Dr. McElroy was commanding officer of the dental corps in war, commanding Morgan's riflemen in that struggle between republics. He was quite wealthy.

W. W. Tripp.

BAKER CITY (Or.) April 24.—W. W. Tripp, an old resident of this city, is dead here, from "neuritis of the brain." He was a prominent dental surgeon and was born in the Little Big Horn in 1876, taking an active part in that previous to the Custer massacre, he headed the scouting party that rescued Mrs. Morgan and Miss White from the Sioux and Cheyennes.

Father J. Kennedy.

CINCINNATI, April 24.—Father J. Kennedy of the Church of the Immaculate Conception, one of the most widely-known of the Roman Catholic priests of Cincinnati, died today.

THURSDAY, APRIL 25, 1901.

POOLING OF SHIPYARDS.

Henry T. Scott Says He's not in It.

Nixon Says Competition is not Avoided.

Combination of Plow-makers—Conference of Railroaders. Strike Abandoned.

PUT HEADS TOGETHER.

BY DIRECT WIRE TO THE TIMES.

WASHINGTON, April 24.—[Exclusive Dispatch.] Reports that the Union Iron Works of San Francisco are uniting with the shipbuilding trust have apparently been printed in the eastern newspapers for several days past.

The morning of the New York Herald.

Henry T. Scott, head of the Union Iron Works, now in New York, and

Walter Nixon, a telegrapher in his office this morning, as he was telephoned of inquiry

to him from The Times Washington

office this morning, asking him

the reports of consolidation were

as follows: "Not

so far as we are concerned,

the consolidated denial from Mr.

Henry T. Scott of the Union

Iron Works, San Francisco, and

Walter Nixon of the Union Iron Works

are not true.

The union iron works will not put the

Union Iron Works into the shipbuilding trust

unions with the previous denial

which he gave.

The situation in China, which Count

Lamsdorff has of late described as

very serious, formed the chief subject

of his conference with M. Delcasse.

According to the Russian view, France

is not showing her solidarity with Rus-

sia notwithstanding the fact that the

two countries are more than ever convinced

that Germany brought about certain

things in China, probably with the se-

cret "arrive-pense" of immobilizing

Russia's attention to the Far East and distract-

ing her from the Balkans. To

discover the best means of putting an

end to the Chinese "adventure" is the

chief aim of the interviews between M.

Delcasse and Count Lamsdorff.

"Russia considers that the Macedo-

nian question is very delicate,

and preparing to have some

action by Russia and France in the

Balkans. M. De Witte has also taken

advantage of the opportunity afforded

by M. Delcasse's visit to treat for closer

economic industrial relations in view

of the probable naval war between Ger-

many and Russia."

the Big Fighters Here—
Other Fights.

The fight between Solly Smith and Joe Bernstein, which is to be pulled off at Hazard's Pavilion on the night of May 10, will under the auspices of the new athletic club, in a number of the most prominent sporting men of the city are interested. The charter of the club has been obtained, and the only matter not definitely settled upon is the name of the new organization. There have been objections to calling it the "Los Angeles Athletic Club" for various reasons, and the men who are interested are on the fence at present in regard to the name.

The sporting fraternity of the city hardly realize the important figure which the new club is to cut, both in local and national athletics. It will be under the control of men whose reputation in the field of sports will be conducted in the interest of sporting generally, with the financial end a secondary consideration. If the club pulls out even on the money the men who are interested are more than satisfied. It is probable that in the next year nearly all of the notable fights of the country will be pulled off in Los Angeles.

Negotiations are now on to bring the Jeffries-Ruhlin fight here. They are being conducted very quietly, but by men known to the public—men who are willing and able to lay out all the money necessary to bring the big mill to this city. With New York out of the picture, it is more than probable that in the next year nearly all of the notable fights of the country will be pulled off in Los Angeles.

The new athletic club here will attract to the city all of the men who are in the oil fields in Southern California, besides a very large majority of the men who are in the metropolis. They count in a very large sporting population in the city which only wants an attractive event to turn out for. The Jeffries-Ruhlin fight conclusion, and it seems a just one, that they can at least pull out even on the right.

The records of the Fiesta fights will give a line on what to expect in the future. If the Griffin-Kennedy and the Smith-Bernstein goes are the success, expect that the city is assured of the best, but the Jeffries-Ruhlin events which will make it the sporting center of the country for the time being. It is probable that McGeown will be called in to find the winner of the last-mentioned bout, and the reason is to expect that if Terry and Frank Erne can come to an agreement as regards to weight, that fight will be the most private one that has ever been seen in Los Angeles railroad yards. The general rule of thumb is to cost below \$60,000.

THE CHARIOT OF HAYES.

President Hayes of the Southern Pacific bowed along the platform in the car "Sunset" which was built two years ago for the use of the directors of the system. The car is the only one in the thousands that has ever been seen in Los Angeles railroad yards. The general rule of thumb is to cost below \$60,000.

LEAGUE BOWLING.

SECOND GAME TODAY.

Tomorrow night the second game of the second game of the City Bowling League schedule will be played, this time between the Chutes team and the new five, which will represent Brunswick-Baile-Caldwell. The Chutes team is generally considered the strongest of the two, but the team on the B.C. are a fine lot, and have been rolling up some big scores in practice. The team has as its captain Mr. John C. Cullen, the consistent bowler in the city who a short time ago was a member of the Cheesecake, the tarpin of the Florida reefs, tender version from the Rockies, lobster and surf fish from the Pacific. Then he envisions his frame

FRIDAY, MAY 10.

6 A. M.—President and party will leave Los Angeles.

2 P. M.—Race meet by Los Angeles Driving Club at Agricultural Park.

Evening—Music and street illumination repeated.

SATURDAY, MAY 11.

Evening—Music and street illumination repeated.

WHEELED PALACES
BEAT THE RECORD.

FIVE hundred and twelve private cars have visited Los Angeles in the past year. The season now closing has been a record breaker in this respect.

Of these palaces on wheels 270 have come over the Southern Pacific, while 246 have rolled over Santa Fe's rails. They represent in actual value an approximate aggregate of \$12,000,000.

The ownership of these cars was about equally divided between the railroads and private individuals. About half of them carried officials representing nearly every trunk line in the country, while the remainder were the personal properties of millionaires who have come from Boston to San Francisco.

Such is the luxury afforded to travel by the ordinary Pullman coach that it would seem next to impossible to surpass it. But the磨 of some of these private cars almost beggars description. A rolling home was recently erected for J. B. Newell, vice-president of the New York Central, which is said to have cost \$125,000. The car in which Mr. Harriman is coming to this city touches the century mark in the thousands. The car is the most valuable private car that has ever been seen in Los Angeles railroad yards. The general rule of thumb is to cost below \$60,000.

THE CHARIOT OF HAYES.

President Hayes of the Southern Pacific bowed along the platform in the car "Sunset" which was built two years ago for the use of the directors of the system. MRS. NATION IN JAIL.

With Three Other Women, the "Joint Smasher" Appears in Court, but Fails to Present Bail.

(BY THE NEW ASSOCIATED PRESS—A.M.)

WICHITA, April 24.—Mrs. Carrie Nation, Mrs. Lucy Wilhite, Mrs. Julia Farnsworth and Lydia Minnie appeared before Judge D. M. Dale this morning in the District Court and failed to give bonds. They occupy one cell in common, the County Jail, and will remain there until a bond is given which is approved, or until the trial at the May term of court. Mrs. Nation failed to secure local bondsman, and the other three refused to give bonds, but agreed that as soon as she came to the trial she would appear. They will be held in jail until the trial.

When the judge committed her, she said: "God bless you, and bring you to repentence."

A PROPOSED PROPAGANDA.

While religious and commercial interests are planning missionary work in all parts of the world, those ambitious people, the Socialists, who want to teach all of us how to do things better than we are doing them now, are not going to sit down idly and let the world run away from them. The Socialists are particularly active just now, not only in the United States, but in other parts of the world also. Indeed, they have so far made much greater advances in European countries than in the United States, which is probably due to the fact that our form of government is liberal enough to suit any reasonable person. That it is not always administered so well, as it might be, may be freely admitted, but then, the correction of this fault lies entirely in the hands of the people, in a country where every adult male citizen has a vote.

As we have said, the Socialists are displaying much activity just now. The latest plan which they have conceived for the purpose of spreading their doctrine is a somewhat ambitious and peculiar one. "The Social Democrats of the world," says a writer in the current number of the Volksschau, a Socialist organ, "ought to select five delegates, one for each of the five continents, America, Europe, Asia, Africa and Australasia, and send them out on a mission throughout the entire globe, with the object of calling upon the nations of the earth to assist us in our task of freeing the working people from the yoke of capitalism and from the infamous wage system, which is productive of so much robbery and slandering."

The writer quoted goes on to say: "America should, if possible, select as her delegates a Socialist who is a descendant of one of our Indian tribes. Europe's representative should be an Aryan and a linguist, and the most capable man who can be found among the German, French, Italian, Spanish, Russian or other European Socialists. Asia could be represented by a native of Japan, China or the Philippines, or by a descendant of any other of the Asiatic races. The delegate from Africa should be a full-blooded negro and the Australasian representative ought to be a pure Maori."

The five delegates should meet in Rome or in some other historical spot which is suitable for such a purpose, and the Social Democrats of that country should give them a notable reception and see that they start on their journey through which the journey is to be made. It will bring the President and the members of the distinguished party which is to accompany him, into closer touch with the great West and its people. It will give to such members of the party as have never taken the transcontinental trip a better idea of the vast extent and the supreme possibilities of the country than they could obtain in any other way.

The people of the entire region through which the Presidential party is to pass, it is needless to say, will do their utmost to show their appreciation of the honor conferred in the President's visit, and the respect which they feel for the Chief Executive of this great and puissant republic. Our distinguished guests will be more than welcome, and all we have will be at their disposal.

GOOD ROADS WORK. Under the Higbie-Armstrong act for the building of good roads, in the State of New York, the sum of \$150,000 was appropriated for the past year. Fifty-three and a half miles of road have been constructed, or are in process of construction, at a total cost of \$77,594, one-half of which expense has been or will be borne by the localities in which the roads (twenty-three in number) are situated. This work, though probably good so far as it goes, is ridiculously small for the great State of New York. Still, it is a fair beginning, and if the roads already built, or in process of building, are constructed on right principles they should prove a valuable object lesson in promoting the good-roads movement. It is stated that further surveys have been made in New York State which will call for an appropriation of \$120,000. Even if these plans be adopted and the roads which they call for be constructed, the outlay will be small as compared to the benefits which the improved highways will confer.

Although the tremendous advantages of good roads are manifest to even the superficial observer, and the great economies effected by their use are undeniable, the aggregate progress which has been made in the work of actual road construction, in the United States, is inconsiderable as compared to the magnitude of the work to be done. There has been no lack of talk, from one end of the country to the other, about the advantages of good roads. But the aggregate of action resulting from all this talk, it must be confessed, is pitifully small. In a few States—as in New York—some practical work has been accomplished with the promise that more will follow. But it is time for this question to be taken up systematically, by practical men, all over the country. The United States leads all other nations of the earth in the vastness of its material resources, and in the enterprise which makes these resources available. But we are behind most or all of the principal nations in the matter of road construction. We should not be content thus to lag in the rear of progress. Every dollar intelligently invested in the construction of good and permanent highways will give large and constant re-

turns in the economies of transit which will be effected, to say nothing of the greatly-enhanced value of all real estate in the vicinity of the improvement.

The time will come when the territory of this entire country will be covered with magnificent highways. This time is very far in the future, perhaps, but it is as sure to come as is the dawning of a new century when the present century is ended. There is a general and growing demand for road improvement, and this demand is certain to make itself felt, in practical form, sooner or later. The growing use of self-propelling vehicles and of the bicycle, will go far in sustaining this demand and in finding ways and means to meet it.

There is no State in the Union which offers a better field for road improvement, nor where the benefits of good roads would be more pronounced, than California. We ought to have the finest roads in the country, for we have not the physical difficulties to overcome which are encountered in regions of ice and snow. We have excellent road-building materials, and all the conditions for scientific road construction and maintenance are favorable—especially in Southern California. The one thing most needed to secure the desired results is practical and intelligent cooperation among the friends of the good-roads movement, to secure the needed legislation, and to set the spirit and purpose of such legislation, once it is secured, are carried out.

And he has the habit of frank speech when he meets the people. His words are not only more frank than thought but he would express many state papers. He goes at a happy time, too. The harassing problems of our island wards are nearer solution than ever before. The people are not wrangling about party doctrines. They have a more active pride in American citizenship than our present generation has had, for they feel that their generation felt the power and the destiny of the nation. The presence of the Executive in a hundred towns and cities, at a time of partisan quiet, will bring home to the people the strength and glory of the nation that they have for their touch and hit the mood of all our active millions. If every citizen of the United States could take this same journey, there would be none left to despair of republican institutions. The Old World dypepals of pessimism is always lost in Texas or California, Oregon or Oregon or in the Yellowstone Park or in the Great Lakes, where there is health for all the limbs of the sedentary mind."

It seems strange that the nurse girl who used to run Rockefellers, Morgan, Carnegie and all the other blooded millionaires up and down the sidewalk in baby perambulators, hasn't come forward and claimed the honor long ago.

An eastern genius has just patented a revolver that shoots over one hundred shots a minute. It's up to the smart Bakersfield officials to lay in a supply instanter if they would solve the footpad mystery.

Miss Homely and Mr. Reasons of Barber County, Kan., were just married. She says she didn't change her name with the idea that she would be any handsomer by so doing, but other reasons were brought to bear upon the matter.

It is understood that the nurse girl, who used to run Rockefellers, Morgan, Carnegie and all the other blooded millionaires up and down the sidewalk in baby perambulators, hasn't come forward and claimed the honor long ago.

It was decided to reject all bacon and go to jail. Saloon men who have taken to their cyclone cellars are wondering whether the story is true or a mere bar-room jolt.

Mr. Nation has decided to reject all bacon and go to jail. Saloon men who have taken to their cyclone cellars are wondering whether the story is true or a mere bar-room jolt.

The horrors of starvation and a winter of privation in the awful Alaska climate are now thawing out, preparatory to their annual spring presentation to the outer world.

Pierpont Morgan now seeks to grab the Dunsmuir collieries at Vancouver Island. He evidently intends to go after any schemer who may want to make it warm for him.

A foreign count has been arrested in Chicago who is said to have figured in over 100 love affairs. The poor man should be liberated. He has suffered enough cruelty already.

A movement is on foot in Spain to put an end to bullfighting. Spain finally has gone away back and begun to dig at one of the evil roots of her down-fall.

Another great uprising of boxers is feared. Your Uncle Samuel stands ready to take his queen in the matter as soon as it becomes necessary.

Bob Fitzsimmons plays "The Honest Blacksmith" on the stage before the public, and the "Dishonest Blacksmith" to his wife in real life.

Dunham has been reported captured again for the "stealthy" time in Clay county, Ala. Don't be too sure about it. Maybe it is Pat Crowe.

STIMSON-LAFAYETTE.

The board of managers of the Stimson-Lafayette Industrial School gave their annual report yesterday afternoon and evening at the school No. 2, St. Louis, Mo. Stimson and members of the school board, and a number of managers in receiving and entertaining. The guests included many persons of prominence who are interested in the work of the school.

The exhibits made of the work by the girls in the school were particularly interesting. During the time the pupils are receiving their education at the school, where they are taught to sew, cook and do various kinds of house work. The work of cooking and sewing is under the direction of Miss Mary McDonald.

A graduate of the Boston School of Domestic Science and the business of the school's work is done much to the attention given it by the instructor.

The girls are also taught to do much of their own sewing, darning and mending.

The neatly-kept school was thoroughly inspected by visitors, who were impressed by the good work that is being conducted there.

During the afternoon a musical program, in charge of Mrs. Ethel Polk of Kansas City, Mo., who has recently made her second visit to Los Angeles, gave a beautiful concert, and Mrs. Polk, accompanied by Oliver and J. P. Dupuy also contributed to the pleasure of the afternoon with vocal solos. Mrs. Lucia Ladd, a young soprano, and Mrs. Owen Foster acted as accompanist on the piano for the vocalists.

WEAR A CARNATION.

A Los Angeles lady suggests that as a carnation, the President's favorite flower, and he almost always wears one, every man in Los Angeles put a carnation in his buttonhole on President's day here. Let's do it!

Venezzuela appears to be rapidly taking a place among those "who also

THE PLAYHOUSES.

THE BURBANK. There is an ocean of tears in "Young Mrs. Winthrop," which was played by the Cummings company at a special matinee at the Burbank yesterday afternoon.

It is a beautiful story—one should have been told in the simplest language and acted sincerely, truly, tenderly, without frills or "cheesy" leading men.

The Cummings version was worth seeing for the admirable work of Ralph Cummings, as Burton Scott, the old family lawyer. It was a delightful piece of acting from first to last, with no false notes. Taken as a whole, however, the production was something else.

They didn't get the heartache out of the death of the little child when the mother comes home from the ball room, and the boy's attempt to guide it and to bring it up with him was a good bit of acting.

The boys at Alameda climbed into an automobile, "to see how it felt."

One boy touched the right side of the hook. None of the boys attempted to guide it and to bring it up with him.

The

men. Mr. and Mrs. L. Matson, Mr. Smith, Mrs. Charles P. Harry Tousenoff, Mrs. J. E. White, A. L. Miss Nettie Brown, Rose Richardson, Mrs. A. J. Brown; Messrs. C. O. White, George.

Surprised.

Mrs. Curtis Silvera, Lady of California, Banner Girl, was the recipient of a pleasant surprise yesterday afternoon, when the river and invited guests, who had opened with a bang, Mrs. Beckwith second prize, Mrs. Beckwith a record, after which she got a round of applause.

Elmer—Peterson. Miss Emma Elmer of Pasadena married next Sunday afternoon to Mr. and Mrs. C. C. Peterson, couple will leave for Canada May 1, where they will make home for the summer.

Perfumery Class.

Miss Anna Peterson, entrepreneur of the perfume class yesterday afternoon, a permanent drill in which the girls were to be instructed. Among those present were: Misses: Ella R. W. T. Lewis, C. W. Owen, Mrs. G. G. Johnson and McDaniel.

THE OPTIMISTS

A semicircle discovered in the amphitheatre license law places the saloons of that date at 11 o'clock p.m. What a noble and a most punctilious measure! The time is now, brave and true, mentioned our City Council.

grindly part with a whole load each if this would keep saloons open all night. Such is the irony of all this.

The latest in combination is that of course, trusts are to cheapen the production of a commodity and limit its output. This time the United Fraternal Tramps would have if the queuing fighting this trust or giving way was left for this August decide!

President Castro of Venezuela. Out of a salary of \$1000 per year he managed to save up the round sum of \$1000 which would suggest that a monument was to be erected to his noble and upright qualities.

GRANGES FOR SEATTLE. A steamer got off from Redondo Port Los Angeles yesterday with boxes of oranges for Seattle to Minneapolis. It is understood that the steamer will call at the regular Seattle port, and that the Southbound handled the fruit, as far as possible, in boxes, as the freight is a great deal less than the cost of shipping.

NOTES. A West Point graduate who was in the good pipe again, tobacco sauce agrees with people better than with wine.

Jean de Reszka, the dancer, had a sore throat, but to the tune of \$20,000, it was a "boomer" on him.

The Princess Chimay and who is said to be so soft she is actually good looking, was again in London, both with a spiciness as ever. Her name about dying. Only she.

Two bad that the Man in the moon was disposed of as Agnus. Of course, we few cigars, but the smoke is sufficient. A little "Bring" may do more.

Inconsiderate detectives bind bars a New York paper declared that if a man has an hour to kill he might as well in four years enough university, equip a mission and challenge Sir Lipton's yacht. The judge was more from you. He made no perfect his piano.

The letter carriers are about their coats to shift the weather demands it. They are not. A queer distinction is to be made if they which they often might get there with the same. They seldom do so. But this is a "good

President McKinley will be in China on his way to the presentation of a medal of the navy for saving the crew. His invention is a sure reason why the admiral apparently begin experiments by
